ENGLISH	C2	C2	B2	B2	B2

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user

PROJECTS

Imperium Ecommerce

Imperium is a full-stack e-commerce Single Page Application (SPA) built using Java Script, HTML, CSS, and PHP. Developed as a university project, it delivers a modern and dynamic shopping experience with a custom routing system, secure login via Google, and integrated Stripe payments.

- My work in this project included : Designing and implementing the **landing page, product listing with filters, product detail view, and login page UI**. Building a **custom client-side and server side routing system** for single-page navigation. Integrated **Google Login** for user authentication and **Stripe** for payment processing.
