Language Skills

Mother tongue(s): **Albanian**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C2	C2	C1	C1	C1

Projects

Imperium Ecommerce

Imperium is a full-stack e-commerce Single Page Application (SPA) built using Java Script, HTML, CSS, and PHP. Developed as a university project, it delivers a modern and dynamic shopping experience with a custom routing system, secure login via Google, and integrated Stripe payments.

My work in this project included : Designing and implementing the landing page, product listing with filters, product detail view, and login page UI. Building a custom client-side and server side routing system for single-page navigation. Integrated Google Login for user authentication and Stripe for payment processing.
